PLANNING BOARD
TECHNICAL REVIEW COMMENTS**

PROJECT NAME: 17K VINEYARDS & SPIRITS
PROJECT NO.: 2024-21
PROJECT LOCATION: SECTION 86, BLOCK 1, LOT 12
REVIEW DATE: 26 JULY 2024
MEETING DATE: 1 AUGUST 2024
PROJECT REPRESENTATIVE: LOU DUBOIS, PE

1. The project proposes a change of use in an existing 1 story 1,814 square foot structure located at the northeast quadrant of the intersection of NYS Route 17K and Colden Hill Road.
2. The current access to the site is via 2 access drives on 17K and a large uncontrolled access to Colden Hill Road at the intersection. A review of the plans identifies proposed parking at two of the access points which will eliminate 17K access road and reduce the Colden Hill Road access. Removal of the access drives should be addressed on the plans with definitive grass islands, curbing, landscaping, etc.
3. Compliance with Code Section 18518C (4) (c) (documented regarding “all new development projects, the first 35 feet of the front yards of all properties on fronting NYS 17K from the City of Newburgh west to the Town of Montgomery shall be landscaped. Private service are marginal roads (except for access driveways) parking of vehicles shall not be permitted in these landscaped areas. The 35 foot dimension shall be expanded to 45 feet for all properties on 17K which lie within 350 feet of the intersections of centerlines of intersecting streets.”
4. Work within the DOT right-of-way to eliminate access drive will require a permit from NYSDOT.
5. The existing entrance depicted on the design plans do not appear similar to the survey plan provided by Jonathan Millen’s office.
6. Parking lot striping must be in compliance with Town of Newburgh, decal attached.
7. Pervious asphalt is proposed to be placed on the site. Limits of all asphalt paving should be depicted. An analysis of the underlying soils must be undertaken to assure pervious pavement will function on the site. Operation and maintenance notes for porous pavement should be added to the plans.
8. The plans identify a storage container spanning the property line on the easterly portion of the site.
9. The plans should address the design guidelines for parking in front yards set backs.

10. Utilities serving the site should be depicted. No fugitive lighting extends past the property lines. Dark sky lighting should be specified.
11. The Bulk Table identifies 12 parking spaces are to be provided. Over 30 parking spaces are depicted on the plans. Applicant's representative is requested to evaluate the parking needs for the site versus the amount parking and pavement proposed. The Planning Board's attention is called to the use of concrete parking bumpers rather than curbing on the site.
12. Coordination with NYSDOT regarding full turning movement at the intersection should be addressed.
13. The fence covered shed area should be addressed as it appears to conflict with the dumpster enclosed proposed on the plans. Is the fence covered shed to be removed?
14. Adjoiner's Notices must be sent as this is an initial appearance before the board.

Respectfully submitted,

MHE Engineering, D.P.C.

STATEMENT TO APPLICANTS

RE: TOWN OF NEWBURGH CLEARING AND GRADING LAW

The Town of Newburgh Clearing and Grading Control Law requires a separate permit for most site preparation activities, including clearing, grading, tree cutting, excavating and filling. Site preparation activities performed following site plan or subdivision approval by the Planning Board may be exempt from the permit application, public hearing, fee and bonding requirements of the law provided the subdivision or site plan application has been reviewed for conformance with the clearing and grading law and the approval conditioned on compliance with the standards set forth in the law. Completion of the attached form will enable the Planning Board to review your application for conformance with the law's requirements. In the event it is not completed you may be required to apply for a separated permit for your site preparation activities. A sediment and erosion control plan and a plan showing the areas to be cleared, filled, graded or subjected to tree cutting, the types of vegetation affected and the proposed disposition of the destroyed vegetation must accompany the form. A SEQRA long form or full EAF should be utilized to discuss any environmental impacts and must accompany the application.
